NeuroCryoStimulation, used in Europe, Australia, UK for 15 years,
now licensed for use in Canada & Vancouver 2010 Winter Olympics

- Reduce Swelling and Pain
- Reduce Pain
- Recover From Injuries Faster & Safely
(Sprains, Strains, Torn Muscles, Tendonitis, Post-surgery care)
- Drug-Free
- Pain-Free (dry cold sensation vs. humid/burning of ice pack)
- Drop skin temperature from 32°C to 2°C in 30-60 seconds with
pressurized CO2 gas jet; compared to a few degrees in a 10-minute
ice application
- Covered by most insurance; offered inexpensively

(see reverse for more details)

introduces a new pain-free treatment alternative for inflammation, pain, and musculoskeletal trauma, called NeuroCryoStimulation

What is NeuroCryoStimulation?

It involves the use of pressurized medical CO₂ gas at low temperatures to cool tissue and create a 'thermal shock' response. This cooling technique is able to rapidly cool the skin's temperature from 32°C to 2°C within 30-60 seconds, versus a few degrees temperature change achieved with a 10-minute ice application. It creates a pain-free dry cold sensation, compared to the humid and sometimes burning sensation of ice.

What are its benefits?

- Analgesia (pain relief)—lasting 3-4 hours.
- Vasomotor reflex—rapid constriction then dilation of blood vessels that drain your vascular system of waste, & swelling and pain-causing substances.
- Anti-inflammatory—controlling & reducing inflammation (reducing the use of anti-inflammatory medications).
- Muscle relaxation.
- Reduced recovery period; back to activity and sports sooner!

What injuries does this help?

- Acute & Chronic injuries
- Arthritis & Fibromyalgia
- Sprains, strains, & torn muscles
- Tendonitis
- Capsulitis (frozen shoulder) & Bursitis (inflamed bursa)
- Post-surgery care (can be used directly on sutures, scars, wounds)
- Carpal tunnel syndrome

Who uses NeuroCryoStimulation?

- European national soccer, cycling, rugby, gymnastics teams
- Anaheim Ducks
- Chicago White Sox
- LA Dodgers
- To be used at the Vancouver 2010 Winter Olympics
